

Children & Families Service

Are you the parent or carer of a child 5-18 with an additional educational need or disability?

We give free support to young people, their parents and carers to explore:

- Getting the right support in school.
- Preparing to leave school or college.
- Available leisure activities.
- Planning for the future – supported employment, training courses, day services, work, supported accommodation.
- Strategies to use in the home.

Our Children and Families Service provides free Information, Advice, Guidance and short term support.

We work in partnership with services that are already available and support families to identify long-term solutions.

You can refer yourself or be referred by a professional.

Please contact us for an informal chat to find out if we can help you.

"Without Heather, I would have little hope for the future of our family in terms of successful educational outcomes and emotional support my sons needs."

Parent

"Receiving support within our home is particularly helpful because Heather can see first hand the difficulties I have to deal with and can therefore offer direct support."

Parent
